Security screening: RCMP Facility Access Security Check, Level 2 (current)

SUMMARY

Algonquin College Networking graduate with hands-on experience in cloud operations and Windows and Linux server administration across on-premises, hybrid and AWS environments. On a six-person capstone team, owned the second site end to end: Proxmox-hosted infrastructure, Active Directory and Samba AD, segmented VLANs behind OPNsense, and Veeam backup with an offsite copy. Extended it into AWS with Terraform and a Kubernetes cluster behind automated TLS. Previously worked as a DevOps Engineer, automating Linux server configuration with Ansible and building CI/CD pipelines for containerized applications. Holds a current RCMP Facility Access Security Check (Level 2). Fluent in English, Turkish, and Mandarin.

TECHNICAL SKILLS

Cloud & Automation: AWS (EC2, VPC, IAM, S3, RDS, Route 53, EKS, CloudFormation, CloudWatch), Azure, Terraform, Ansible, Helm, Docker, Kubernetes, Jenkins, Git, CI/CD pipelines, infrastructure as code

Systems & Virtualization: Linux (Red Hat, Ubuntu, SUSE), Windows Server 2019/2022, Active Directory, Group Policy, Samba AD, LDAP, Kerberos, SSSD, VMware, Proxmox VE, iSCSI SAN, SMB file shares, RAID, HP ProLiant hardware, Veeam backup and restore

Networking & Security: TCP/IP, DNS, DHCP, VLANs, IPv4 subnetting, routing and switching, OSPF, firewalls (OPNsense), NAT and access rules, OpenVPN site-to-site, TLS, OpenSSL and Let's Encrypt automation, Cisco IOS, Wireshark, tcpdump

Applications & Scripting: Tomcat and JVM services, nginx, Caddy reverse proxy, MySQL, PostgreSQL, SQL, Python, Bash, PowerShell, monitoring with Prometheus and Grafana, technical documentation and runbooks

INFRASTRUCTURE PROJECT

Two-Site Hybrid Environment – Algonquin Capstone, 6-person team Jan 2026 – Apr 2026

- Owned the 17-VM second site end to end, serving two client tenants with isolated infrastructure, and contributed to the shared on-premises site built on two HP ProLiant DL380 servers running Proxmox VE with RAID and an iSCSI SAN.
- Stood up Windows Server 2022 Active Directory for one tenant and Samba AD with LDAP for the other, including domain controllers, OUs, Group Policy, DNS and DHCP, with Linux clients realm joined through SSSD.
- Configured OPNsense firewalls with NAT and access rules, segmented VLANs across client, server, DMZ, SAN and management subnets, and a site to site OpenVPN tunnel linking the two locations.
- Extended the environment into AWS with Terraform and S3 remote state, bootstrapped a two-node kubeadm Kubernetes cluster on EC2, and served a containerized application behind automated TLS certificate issuance and renewal.
- Implemented Veeam backup with agentless VM jobs, file level client backups and an offsite copy between sites, tested restores, and produced the operational documentation for handover to the supporting team.

PROFESSIONAL EXPERIENCE

System Engineering Intern – Interac Corp.

Sep 2025 – Dec 2025

Toronto, ON

- Developed a Python-based Proof of Concept to automate device inventory extraction from vendor APIs, establishing a validation schema that paved the way for replacing manual tracking.
- Collaborated with senior engineers to manage ServiceNow incidents and updated internal wiki runbooks, accelerating onboarding for new team members.

DevOps Engineer – Nioyatech LLC

Nov 2022 – May 2024

Remote from Ottawa, ON (US-based employer)

- Improved reliability across 30+ Linux servers by authoring Ansible playbooks and roles for configuration, patch management, and compliance baselines, cutting manual setup effort across fleets.
- Automated provisioning for 3 multi-tier AWS environments (EC2, S3, RDS, Lambda, IAM, VPC, EKS) with Terraform and CloudFormation, standardizing reusable infrastructure patterns.
- Built Jenkins and Git CI/CD pipelines for 20+ applications and deployed containerized workloads with Docker and Kubernetes, enabling zero downtime releases.

EDUCATION & CERTIFICATIONS

Computer Systems Technician – Networking, Algonquin College, Ottawa, ON

Apr 2026

Graduated with Honours • GPA: 3.75 / 4.0

Bachelor of Arts, Chinese Language, Nanjing University, Nanjing, China

Jun 2016

Certifications: AWS Certified Solutions Architect – Associate and AWS Certified Cloud Practitioner (2023–2026)

Training: Cisco Networking Academy, CCNA: Switching, Routing and Wireless Essentials (course)

Languages: English (professional) | Turkish (native) | Mandarin Chinese (advanced, HSK 6)
